JonEric Eubanks

AI Engineer · Azure AI Foundry & Multi-Agent Systems · Power Platform

Buffalo Grove, IL | joneric11@gmail.com | linkedin.com/in/joneric-eubanks-pmp-developer | github.com/JonEricEubanks | **Portfolio**

SUMMARY

AI engineer and Power Platform developer with 12+ years in local-government technology. **Three-time Microsoft competition winner** (Best IQ Agent, Best Agent, Best in Automation) and published Microsoft Tech Community author who leads projects end to end — discovery, process mapping, build, and rollout — from multi-agent systems on Azure AI Foundry to Power Platform apps running in six Illinois municipalities.

CORE SKILLS

AI & Agents: Azure AI Foundry, Copilot Studio, agent orchestration, MCP, RAG/GraphRAG, Azure AI Search, GPT-4o, GitHub Copilot
Development & Azure: JavaScript, Node.js, React, Python, SQL, REST APIs, Azure Functions, Static Web Apps, Cosmos DB
Power Platform & GIS: Power Apps, Power Automate, Power BI, Dataverse, SharePoint, Teams, ArcGIS Pro, ArcGIS Online
Delivery: Project management, Agile, Lean Six Sigma, process mapping, stakeholder management, technical writing

EXPERIENCE

MGP (Municipal GIS Partners) — *Illinois* 2023 – Present
Low-Code Developer (Dec 2024–Present) · M365 Functional Consultant (Feb–Dec 2024) · GIS Specialist (2023–Feb 2024)

- Won Microsoft's global **Best in Automation** award (2025) and a Microsoft case study for the Employment Lifecycle Management (ELM) app — led from discovery (HR and 7 department heads) through the Power Apps build.
- Rolled ELM out to 6 municipalities (Brookfield, Buffalo Grove, Riverside, Glencoe, Lincolnshire, Hanover Park), re-mapping each community's processes; the app saves 400+ staff hours per year.
- Built LISA, a Copilot Studio agent grounded in municipal GIS data that automates 3,600+ property lookups a year (zoning, utilities, ownership), eliminating manual GIS research.
- Delivered client Power Platform solutions: digitized Brookfield's block-party permits across Police, Fire, and Public Works (55+ hrs/yr saved); modernized Glencoe's water-service records into a mobile Power App (60+ hrs/yr); built Buffalo Grove's dashboard overseeing a $7.2M capital project; designed SharePoint intranets and Teams governance for municipal clients.

City of Fort Worth — *Fort Worth, TX* 2014 – 2023
Development Project Coordinator (2022–23) · Neighborhood Program Coordinator (2017–22) · Neighborhood Services Liaison (2014–17)

- Built Power BI and Smartsheet dashboards for leadership and City Council, including an Emergency Rental Assistance dashboard tracking $53M in federal aid across all council districts; raised agency efficiency 27% through weekly decision reports.
- Streamlined development permitting and cut Council Member program completion time 25% using Lean Six Sigma; saved ~10% on project costs through contractor bid negotiation.
- Analyzed Community Development Block Grant data to help secure $2M for low-income neighborhood development; grew community engagement 30% through outreach campaigns.

AWARD-WINNING AI PROJECTS · SOLO BUILDS

CivicGrant IQ — *Best IQ Agent, Microsoft Agents League 2026 (~31,000 contestants)* Live app ↗

- Five-agent municipal grant-intelligence system on Azure AI Foundry: 6-step grounded GraphRAG reasoning with every figure cited to a source document; integrates Foundry IQ, Work IQ, and Fabric IQ; React 18 UI streaming 23 SSE event types.

CivicLens — *Best Agent, Microsoft JavaScript AI Build-a-thon 2026 (~1,000 contestants)* Live app ↗

- 5-stage agent pipeline (Intent → Data/ReAct → RAG → Synthesis → Report) backed by a JSON-RPC 2.0 MCP server with 16 tools; Leaflet hazard map with Weibull-decay prioritization of infrastructure work.

Also built: MAINTAIN AI (Microsoft AI Dev Days Hackathon 2026) — 6 agents predict crew needs from 1,281+ work orders · Kaizen AI (GitHub Copilot Hackathon 2026) — AI certification study coach on Power Apps Code Apps and Dataverse.

PUBLICATIONS & COMMUNITY

Published 4 articles on Microsoft Tech Community, incl. "Choosing Multi-Agent Patterns in Microsoft Foundry" and "Understanding Harnesses in Copilot Studio"; created AI Teammate 101, a free, open-source workshop on working with AI coding agents.

CERTIFICATIONS & EDUCATION

GitHub Certified: Agentic AI Developer (2026) · Microsoft Certified: Azure AI Fundamentals (2026) · Microsoft Applied Skills: Develop Agents in Microsoft Foundry; Resolve GitHub Issues Using GitHub Copilot (2026) · Microsoft Certified: Power Platform Fundamentals (2025) · Microsoft 365 Certified: Fundamentals (2025) · Google Project Management & Data Analytics Professional Certificates (2020) · Lean Six Sigma Yellow Belt (2016)

Education: GIS Programming & Data Analysis coursework, Tarrant County College · Applied Aviation Sciences, Baylor University
